(2) Maximum base for computation. Overtime compensation shall be paid only upon such portion of the basic rate of compensation of an officer or employee as does not exceed \$2,900 per annum.

§ 20.16 Deduction for leave without pay. In the case of an employee paid at an annual rate:

(a) If, under § 20.14 of this part, the employee receives, in lieu of overtime compensation, additional compensation at a rate of \$300 per annum, the deduction from such additional compensation shall be ½60 of \$300 for each day of leave without pay.

PART 3191-CIVILIAN AIRCRAFT [Limitation Order L-48, Direction 1]

MODIFICATION OF SURPLUS GOVERNMENT AIRPLANES

The following direction is issued pursuant to Limitation Order L-48:

(a) Modification of airplanes disposed of by the United States Government. Any person may modify or overhaul any airplane disposed of by the United States Government. notwithstanding the provisions of Order L-48; but, in doing so, he must not interfere with an authorized production schedule or

with production to fill rated purchase orders.
(b) How "operators" get materials. "Oper-(b) How "operators" get materials. "Operators", as defined in Order P-47, may get materials under the provisions of Order P-47 to modify or overhaul airplanes disposed of by the United States Government.

(c) How other persons get materials. Any aircraft manufacturer, aircraft repair shop, or person listed on Schedule A of CMP Regula-tion 5 who wants to modify or overhaul airplanes disposed of by the United States Government may use any materials which he has in his stock, if the materials cannot be used to fill authorized production schedules or rated orders which he has on hand. However, this does not permit a person to use material obtained with priorities assistance which was given for another purpose, unless Priorities Regulation 13 would have permitted him to buy that material on a special sale with a rating of AA-3 or lower and with-out special permission of the War Production Board. Furthermore, restrictions on the uso of such materials in other orders and regulations must be complied with. In addition, he may use a preference rating of AA-3 and the allotment symbol S-4 to get any materials he needs for the work, which are not available from his own surplus stocks. He may get these materials by placing on his purchase orders the allotment symbol and rating and the certification provided in Priorities Regulation 7.

> PART 1010—SUSPENSION ORDERS [Suspension Order S-645]

CASEY'S MARKET & COLD STORAGE

Stephen A. Casey, doing business as Casey's Market & Cold Storage, at 14339 Bothell Way, Seattle, Washington, owns and operates a grocery store and frozen food locker plant. On March 9, 1944 he began construction of a new addition to this locker plant without authorization from the War Production Board. The cost of this construction was in excess of \$2,575.00 which amount exceeded the limit of \$200 permitted by Conservation Order L-41, and was in violation of that order. Stephen A. Casey was aware of the War Production Board restrictions on construction and the beginning and carrying on of this construction without authorization constituted a wilful violation of Conservation Order L-41.

This violation of Conservation Order L-41 has diverted critical materials to uses not authorized by the War Production Board, and has hampered and impeded the war effort of the United States of America. In view of the foregoing, it is hereby ordered, that:

§ 1010.645 Suspension Order No. S-645. (a) Neither Stephen A. Casey, his successors or assigns, nor any other person, shall do any construction on the premises at 14339 Bothell Way, Seattle, Washington, including the putting up, completion, or alteration of the structure, unless hereafter specifically authorized in writing by the War Production Board.

(b) Nothing contained in this order shall be deemed to relieve Stephen A. Casey, his successors or assigns, from any restriction, prohibition, or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

Issued this 28th day of October 1944.

PART 3133—PRINTING AND PUBLISHING [Limitation Order L-240, Interpretation 4]

TRANSIT DAMAGE

The following interpretation is issued with respect to Limitation Order L-240:

Paragraph (f) of Order L-240 states in part: "Transit damage shall not be included in a publisher's 'use' of print paper." This provision which was inserted in the order on December 24, 1943, merely explained, and did not change, the existing rule.

At all times since the issuance of Order L-240 on December 31, 1942, a publisher has been obliged to charge against his consumption quota only the print paper which was actually "used" in publishing his newspaper; print paper which was destroyed or damaged in transit need not be charged against the publisher's consumption quota to the extent that such print paper was rendered unusable in the publication of his newspaper. However, at all times since the issuance of Order L-240 on December 31, 1942, production waste has been included in the tonnage of print paper which is "used" in publishing a news-

(1) "Operator" means any individual, partnership, association, business trust, corporation, receiver, or any form of enterprise whatsoever, whether incorporated or not, the United States, the District of Columbia, any state or territory of the United States, any political, corporate, administrative or other division or agency thereof, to the extent engaged in rendering telephone communication service within, to, or from the United States, its territories or possessions.

- (3) [Revoked Oct. 30, 1944.]
- (4) [Revoked July 17, 1944.]
- (5) [Revoked July 17, 1944.]

(6) "Schedule A service" means service to the extent required for the proper discharge of duties in the direct defense, public health, welfare and security categories listed on Schedule A attached.

(7) "Interim service" includes all service installed or reconnected on and after April 15, 1943 which requires an allocation or assignment of exchange central office station terminal equipment or exchange line plant. It also includes any service installed prior to that date according to a contract specifying that the service was on an interim basis.

(b) Conservation. (1) Operators shall conserve scarce and critical materials by the employment of all practical methods.

- (2) [Revoked Jan. 20, 1944](3) Operators shall discontinue the further installation of dial P. B. X. systems and dial private intercommunicating systems. This provision does not prevent the installation of systems of less than 100 lines where the equipment is already in the stock of the operator or can be obtained from the stock of another operator. Nor does it bar additions to dial systems. Nor does it bar moves for the same business service within the same exchange area, or to a contiguous exchange area of the same
- (c) Availability of facilities for essential uses. (1) Operators shall disconnect service when they learn that the present real user of service is not a user contemplated in the service agreement. Any such disconnections shall be considered "normal disconnections" within the meaning of paragraph (c) (2) be-
- (2) Exchange line plant, exchange central office equipment, or telephone sets made available through normal disconnection or by new acquisition shall be used to take care of applications for service in the following order:

(i) Schedule A service, public pay station service and service specifically authorized by the War Production Board because of essentiality or unreasonable hardship.

(ii) Changes of address of business service within the same exchange or to another exchange of the same operator within the same metropolitan area or within such other area as is defined by the operator's established practices; and,

within the same area, restoration of business "interim service" disconnected to make facilities available for Schedule A service.

(iii) Changes of address of residence service within the same exchange or to another exchange of the same operator within the same metropolitan area or within such other area as is defined by the operator's established practices; and, within the same area, restoration of residence "interim service" disconnected to make facilities available for Schedule A service.

(iv) New business service and additions to existing business service.

(v) New residence service set forth in Schedule B.

(vi) New residence service set forth in Schedule C.

(vii) New residence service other than that included in categories (i), (v) and (vi).

(viii) Where the operator finds that immediate installation of service is essential to the protection of life, such installation may be made as an exception to the order provided in the above categories. Such service shall, however, be disconnected promptly at the termination of the emergency and the facilities used to take care of applications as otherwise specified above.

(3) Idle facilities may be reserved to the extent operators find necessary to meet promptly the known or fairly anticipated requirements for Schedule A service and to provide for essential pub-

lic pay station service.

(4) To the extent necessary to meet minimum needs for Schedule A service and for essential public pay station service, operators shall make available additional exchange central office equipment or exchange line plant by regrading any service or disconnecting "interim service" under the following provisions:

(i) "Interim service" shall not be subject to disconnection so long as it continues to meet the requirements of Schedule A service or essential public pay

station service.

(ii) Regrading is to be done only when current installations of central office equipment permit. Regrading of Schedule A service and of business service is to be done only if regraded service meets minimum service needs.

(iii) In so far as practical these steps shall be taken in the following order. Regrading shall precede disconnection. Residence service shall be regraded or disconnected before business service. Any regrading or disconnection shall be in the reverse order of the dates of connection at the existing locations, that is, the most recent shall be regraded or disconnected first.

(5) Subject to the provisions of (c) (4) (ii) and (c) (4) (iii) above, operators shall regrade existing service to the extent necessary to provide service authorized by the War Production Board because of unreasonable hardship.

(d) Limitations on additional telephones. (1) Main stations. Operators shall limit the number of main telephone stations, including P. B. X. trunks, connected to any central office to 105% of the number the central office was designed to serve under pre-war engineering and operating practices. This provision has the following exclusions and exceptions:

(i) Main stations do not include ex-

tensions or P. B. X. stations.

(ii) If the number of main stations connected to a central, office on March 25, 1943 exceeded the 105% limit, the number need not be reduced so long as service is satisfactory.

(iii) The 105% limitation need not be applied to a single-office exchange which is designed to serve less than 1,000 main

stations.

(iv) The War Production Board may approve a percentage other than 105%

for any central office.

(2) Residence extension service. Operators shall not install or reconnect residence extension telephones, residence extension bells or residence P. B. X. telephones, nor as a substitute provide additional main lines or stations on party lines, nor install jacks and plugs for residence service. This provision has the following exclusions and exceptions.

(i) Jacks already in place may be reconnected provided that no more than one telephone and one bell shall be furnished with the telephone line with which the jacks are associated.

(ii) Temporary installations of one residence extension may be made when the operator finds it essential in cases of

serious illness.

(iii) For practicing physicians and surgeons, the following services may be provided, but the operator shall supply the minimum which will meet professional requirements. The operator may install two jacks and make the main station telephone a portable telephone, or, as an alternative, install one extension telephone or, as an alternative, install two jacks for use with a single portable extension telephone. The operator may also provide a connection with an answering bureau.

(iv) The installation and reconnection in residence quarters of telephones connected to private branch exchanges serving hotels, apartment houses, etc., may be made to the extent that no more than one such telephone may be provided in any residence quarters.

(e) [Revoked July 17, 1944.]

(f) Limitation on replacements. Operators shall not make replacements of P. B. X. systems with dial equipment.

(g) [Revoked Oct. 30, 1944.]

(h) Non-applicability to certain replacements and additions. (1) The terms of this order shall not prohibit wire communications projects approved by the War Production Board on form WPB-2774 or other appropriate form.

(2) Nor do they prohibit the completion of a project the physical installation of which was started at a time when the project was permitted by Order L-50 or an earlier issue of Order U-2.

(i) [Revoked July 17, 1944.]

(j) Exemption of armed forces. The restrictions of paragraphs (b) (3) and (f) shall not apply to facilities for the official use of the armed forces or the Veterans' Administration.

(k) Engineering and planning. All operators shall engineer all replacements or additions to central office equipment so as to limit the margin for expected growth of requirements to a period not in excess of one and one-half years.

(1) Reports. All operators affected by this order shall execute and file with the Office of War Utilities such reports as the Director, Office of War Utilities, shall from time to time require; subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(m) [Revoked Jan. 20, 1944]

(n) Appeals and applications. Appeals or applications for relief from paragraphs (b) (3) and (f), involving the installation of dial P. B. X. equipment and dial private intercommunicating systems, should be submitted on Form WPB-2774. Other applications or appeals should be filed on Form WPB-2117.

(o) Violations. Any person who wilfully violates any provision of the order or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control, and may be deprived of priorities assistance.

(p) Communications. All reports required to be filed hereunder, and all communications concerning this order, shall, unless otherwise directed, be addressed to: Communications Division, Office of War Utilities, War Production Board, Washington 25, D. C., Ref.: U-2.

PART 3290-TEXTILE, CLOTHING AND LEATHER

[Supplementary Order M-317B, as Amended Oct. 30, 1944]

COTTON SALE YARN PRODUCTION AND DISTRIBUTION

§ 3290.117° Supplementary Order M-317B-(a) Contents of this order.

This Order M-317B is supplementary to Order M-317 and contains Preference Rating Schedules and a Distribution Schedule referred to in that order. These schedules apply only to cotton yarn. (Cotton yarn is included in the definition of "Cotton textiles" in Order M-317.) This order also contains provisions relating to production of cotton yarn, including provisions which have been transferred from Order L-99 to this order. Furthermore, it contains provisions relating to distribution of cotton yarn which are in addition to those contained in Order M-317.

(b) Specific directions to producers and converters. No producer or converter of cotton yarn shall produce, convert or deliver cotton yarn and no person shall accept delivery of cotton yarn from a producer or converter contrary to any specific direction which may be issued from time to time by the War Production Board.

(c) Operation of spinning machinery. (1) No person, regardless of the presentation of rated orders, shall operate spinning machinery (i. e., roving, ring, mule or converted twister spindles) contrary to the provisions in the Sale Yarn Production Schedule of this supplementary order.

(2) Spinning machinery acquired after July 3, 1943. No person shall operate any spinning machinery acquired (the term includes leasing or renting) by him after July 3, 1943, except for the production of yarn required to be produced by paragraph (d) of this supplementary order or as specifically authorized in writing by the War Production Board. For such authorizations, application may be made by letter to the War Production Board stating all facts which the applicant deems important and pertinent to his particular case. In all instances he shall state the type of yarn he wishes to produce and in instances where he has acquired used spinning machinery he shall state the name of the person who formerly owned or controlled the equipment and the yarn produced by such former owner. Authorizations will be granted to maintain a maximum practical production of cotton yarn.

(d) Sale yarn production directions-(1) Yarn described in sale yarn production schedule. Each producer of yarn must in each calendar quarter produce and deliver at least the same poundage of cotton yarn in the description and counts listed for each of the numbered groups in the "May produce only" column of the Sale Yarn Production Schedule of this supplementary order as he delivered in these groups in that calendar quarter of 1943 in which he delivered the largest percentage of his yarn production. This calendar quarter is called "base period." The required poundage of each description and count of yarn must be produced for sale at the same price (or any increase subsequently granted by the OPA for the same description and count) at which the required poundage in the particular description and count was produced in the base period. No part of this yarn re-

<sup>&</sup>lt;sup>2</sup> Formerly § 3290.118b.

quired to fill rated orders shall be tinted, dyed, or otherwise colored, unless the rated order calls for a tinted, dyed, or

otherwise colored yarn.

(2) Duck yarns. Each producer must in each calendar week produce and deliver duck yarns of at least the same poundage as he delivered in the week in 1944 in which he delivered the largest poundage of duck yarns. Each producer shall be deemed in compliance with this paragraph (d) (2) as long as he delivers each week at least the same poundage of duck yarns as he delivered in the week in 1944 in which he delivered the largest poundage of duck yarns.

Producers who have facilities which can produce additional quantities of duck yarns may receive special directions from the War Production Board to deliver specific amounts to designated

weavers.

(3) Twine layers and ring twisters operations. Each Haskell-Dawes, Brownell or ring twister and each twine layer in the possession or under the control of any producer shall be operated at least as many hours per week as any twister or any twine layer is operated at

the same plant.

(e) Restrictions on distribution and use of cotton yarn and roving—(1) Roving. No spinner shall use or dispose of roving except for spinning or on rated orders, unless specifically authorized in writing by the War Production Board. An authorization to use roving for other purposes may be granted if the War Production Board finds that the roving produced by spinners, who do not have spinning spindles, is not needed to fill rated orders, or in cases where spinners show that their spinning spindles are operating at maximum capacity. secure such authorizations, an application must be made by letter to the War Production Board, stating the quantity of roving which the applicant wishes to use or dispose of for other than spinning or the filling of rated orders; and the hours per week which each spinning machine is being operated.

(2) (i) Seine twine, hawser cord, cabled cord, twisted or braided cord rope. Sales. No person shall sell, purchase, deliver or accept delivery of cotton seine twine, hawser cord or other cabled cord, or twisted or braided cord rope 1/8 to 3/8 inch in diameter, inclusive (even to fill orders of the Army, Navy, Maritime Commission or War Shipping Administration) except to fill an order bearing a preference rating assigned on Form WPB-2842, WPB-547 (distributors application for preference rating), or a rating assigned by the Foreign Economic Administration, or a rating assigned in connection with an authorization from the Canadian Cotton Administrator. Insofar as practicable, authorizations will cover quarterly periods.

(ii) The following transactions are exempted from the restrictions in subdivision (i):

(a) Sales by wholesalers and retailers; (b) sales made directly by a producer to a consumer for his own use, provided that not more than 25 pounds per month may be sold to any one customer; (c) sales which are authorized pursuant to written application to the War Production Board (application for such authorization shall be made by letter and will be granted within the available supply to producers of commercial fish netting who regularly sold such material prior to August 15, 1944, to commercial fish netting users for hanging and repair of netting and insofar as practicable, authorizations will cover quarterly periods); and (d) deliveries made prior to October 1, 1944, on orders accepted prior to August 15, 1944, from the Army, Navy, Maritime Commission or War Shipping Administration.

(3) Use by integrated mills producing seine twine, hawser cord, or other cabled cord. No person who produces seine twine, hawser cord or other cabled cord shall use it for the manufacture of netting or other purposes even in plants owned or controlled by him unless authorized by the War Production Board pursuant to application by letter. The authorization will be based on the procurements of the Armed Services for camouflage netting and the needs for commercial fish netting. Insofar as practicable, authorizations will cover quarterly periods.

(4) Use of seine twine, hawser cord, cabled cord, twisted or braided cord rope obtained with a preference rating. No person shall put into process, process or commercially use any seine twine, hawser cord or other cabled cord, or twisted or braided cord rope 1/8 to 3/8 inch in diameter, inclusive, which he obtained by the use of a preference rating, other than

for the specific purpose or purposes authorized by the form assigning the rating. If the rating is assigned on Form WPB-547, the authorized purpose is resale. If the rating is assigned by the Foreign Economic Administration, or in connection with an authorization from the Canadian Cotton Administrator, the authorized purpose is export. If the rating is assigned on Form WPB-2842 for delivery to or for the account of the Army or Navy of the United States, the Maritime Commission or the War Shipping Administration, the authorized purpose is filling the specific agency contract(s) listed in the form unless otherwise authorized in the form. In all other cases the authorized purpose is the one specifically stated in Form WPB-2842 assigning the rating.

Issued this 30th day of October 1944.

Note: Following schedules amended in their entirety Oct. 30, 1944.

SALE YARN PRODUCTION SCHEDULE

Roving, ring, mule or converted twister spindles which on July 1, 1944 produced or were assigned to produce the yarn and twine listed in the column captioned "Did produce" may produce only yarn and twine of the descriptions and counts specified in the column captioned "May produce only". This, however, shall not prevent the production to fill specific orders on hand rated AA-2X or higher. However, after those AA-2X or higher orders have been filled the spinning machinery must produce the yarn or twine specified for it in the "May produce only" column.

All authorizations relating to the subject matter of this schedule issued before July 22, 1944, on appeal from Limitation Order L-99 or from Supplementary Limitation Order L-99-a are revoked.

(a) Exempt sales. (1) The maximum prices for export sales shall be determined in accordance with the provisions of the Second Revised Maximum Export Price Regulation, issued by the Office of Price Administration.

(2) Sales or deliveries of any commodity listed in Appendix A to the War Department or the Department of the Navy of the United States, shall be exempt from this regulation, but sales or deliveries of any such commodity to Post Exchanges shall be subject to this regulation.

(3) On sales and deliveries of any commodity subject to this regulation, to a Procurement Agency of the United States, involving extra packing expenses, the seller, or any sub-contractor under the seller's contract with the United States, may add to the maximum prices specified herein the appropriate amount for special packing, as provided in Revised Supplementary Order No. 34.

(4) Whenever circumstances of emergency make the purchase of any commodity subject to this regulation, by the United States or any of its agencies imperative, and it is impossible to secure, or unfair to require, immediate delivery at the maximum price which would otherwise be applicable, such purchases and deliveries may be made pursuant to the provisions of section 4.3 (f) of Revised Supplementary Regulation No. 1 to the General Maximum Price Regulation, as amended: Provided, however, That the Administrator may, by order, waive the reporting of any part of the information required by section 4.3 (f) in connection with a particular purchase, or group of purchases, upon determining that such information may not reasonably be required under all the circumstances, and he may, in lieu thereof, require the reporting of other information more suited to the circumstances, subject to the approval of the Bureau of the Budget.

- 2. The first sentence of section 12 (c) is amended to read as follows:
- (c) If the producer cannot establish an appropriate maximum price under the foregoing provisions; he shall apply to the Regional Office of the Office of Price Administration for the region in which the commodity is produced, for a maximum price on such commodity.
- 3. Section 13 is amended to read as follows:

Sec. 13. Calculation and reporting of maximum prices by producers—(a) (1) Maximum prices must be calculated and reported. No producer subject to this regulation shall sell any of the commodities listed in Appendix A hereof, until ho has calculated and reported his maxi-

mum price to the Office of Price Administration. If such report was filed pursuant to Maximum Price Regulation No. 319 by the producer, or if the producer is the transferee of a bakery plant, by his transferor, such report shall satisfy the requirements hereof, until a further report is required under this revised regulation. In all other cases, the report shall show:

(i) The present maximum price and weight of each commodity produced; and

(ii) The maximum price and weight of each such commodity during the base period, specified in Appendix A, or, in the case of a commodity which was not produced during such base period, the maximum price and weight of such commodity as first calculated and reported pursuant to the provisions of this regulation, or the original Maximum Price Regulation No. 319.

.(2) Optional method of calculating maximum prices on sales of pies.<sup>2</sup> Producers of pies may continue to calculate their maximum prices on sales thereof in the manner described in subparagraph (1) of this paragraph (a), or, subject to the qualifications set forth below, they may calculate their maximum prices on such sales by deducting the weighted average of their costs of ingredients, packaging materials and direct labor during the base period, or, if the particular size of pie was not produced during the base period, then by deducting the weighted averages of such costs, as first reported by them, for each size of pie they produced, irrespective of the type of filler in such pie, from the weighted average maximum price during the base period, or, if the particular size of pie was not produced during the base period, from the weighted average maximum price as first reported by them, of each size of pie. The resultant sum shall be the markup for that size of pie, and to this markup the producer shall add the average, for that size of pie, of his present cost of ingredients and packaging materials, and the average for that size of pie, of his direct labor costs, as last reported by him, each weighted by the volume of each variety of pie of that size which he produced during the preceding six month period, in order to determine his maximum price on sales of that size of pie.

If a producer elects to calculate his maximum prices pursuant to this optional method of calculation, he shall include all the kinds of pies of a particular size, and the number of each kind of pie of that size, which he produces, in determining his maximum price on sales of that size of pie; and he shall indicate his method of calculation on the report which he files.

The average cost of ingredients, packaging materials and direct labor is to be determined by multiplying the cost of

ingredients, or packaging materials, or direct labor (as last reported), as the case may be, per pie of each size and variety, by the volume of that size and variety produced during the preceding six month period; adding the individual products resulting from such multiplication, and dividing the sum thereof by the total volume of the size produced during the preceding six month period.

If the records kept by any producer are such that he is unable to determine the weighted averages of his ingredient. packaging materials and direct labor costs, and of his markups, during the six month period preceding October 1944, for each variety and size that he produced, then, if that producer elects to report his maximum prices in October 1944, following this optional method of calculation, he shall determine the size of pie he produced in the greatest number during said six month period. Then, he shall take the total amount of each filler used by him in the preceding six months and divide this total by the amount of filler used in each pie of that size. The result will be the number of that variety to be used in weighting current costs, and the number so obtained should be used for each size of pie he produces.

(3) Maximum prices for sales to ultimate consumers shall be reported to the state or district office of the Office of Price Administration for the state or district in which the commodities are produced. Maximum prices for sales to retailers shall be reported to the Office of Price Administration in Washington, D. C.

(b) Recalculation of maximum prices. During the months of April and October of each year, commencing with the month of April 1944, every producer subject to this regulation shall recalculate his maximum prices for the sale of all commodities sold by him, listed in Appendix A, on the basis of his then existing cost of ingredients and packaging materials, but using the previously reported direct labor costs and markup, except that if a producer of pies has reported his maximum prices on sales of such pies pursuant to subparagraph (2) of section 13 (a), he may recalculate his maximum prices by using the weighted average of his then existing costs of ingredients and packaging materials with respect to all ples of a particular size, and his previously reported weighted average of direct labor costs and markup for that size of

If a producer is not manufacturing a commodity at the time for recalculation of his maximum prices, he need not recalculate his maximum price for that commodity at such time, but when production is resumed, he shall report a recalculation of his maximum price on such commodity either on the basis of his then existing costs of ingredients and packaging materials, but using his previously reported direct labor costs and markups, or, in the case of pies, if the previous

report was under section 13 (a) (2), on the basis of the weighted average of his then existing costs of ingredients and packaging materials, but using his previously reported weighted average of direct labor costs and markups.

Each producer shall report these new maximum prices to the Office of Price Administration, as provided in paragraph (a) of this section, unless he elects to continue to sell at the same maximum price by making the appropriate change in package or unit net weight as provided in paragraph (d) of this section.

If a producer is the transferee of a bakery plant, and he has been unable to ascertain the direct labor costs and markup of his transferor in connection with any commodity listed in Appendix A, then, at the time he makes his recalculation, he shall apply to the Regional Office of the Office of Price Administration for the region in which the commodity is produced for the establishment of his maximum price for sales of that commodity, in the manner set forth in section 12 (c) of this regulation, except that the information required to be furnished in section 12 (c) (1) need not be set forth.

(c) Modification of maximum prices. Whenever a maximum price calculated and reported under this regulation appears to be based upon a miscalculation, or appears to be excessive, the Office of Price Administration may require the filing of data supporting the price as calculated and reported. After a maximum price has been calculated and reported, it may not be changed except by written consent of the Office of Price Administration, which will be given only in cases of excusable clerical error or other mistake.

(d) Price changes may be reflected in unit weight changes. If the producer elects to reflect the maximum price changes prescribed by this section, by making changes in package or unit net weight, he shall, at the time of recalculation, divide his existing maximum price per unit of the commodity by his maximum price as recalculated, and then multiply the existing package or unit net weight of the commodity by the percentage so determined. The resulting figure shall be the new package or unit net weight for sales at the maximum price prevailing prior to the recalculation in question. Such package or unit net weight changes, together with applicable maximum prices, must be reported to the Office of Price Administration, as provided in paragraph (a) of this section.

(e) Adjustments of fractions of a cent. If the figure resulting from the calculation of any maximum price contains a fraction of one-half cent, or more, it shall be adjusted to the next higher cent, and if it contains a fraction of less than one-half cent, it shall be adjusted to the next lower cent.

4. Section 14 is amended to read as follows:

SEC. 14. Producers must show ultimate consumer prices on packaged items or

<sup>&</sup>lt;sup>2</sup> Examples of the method of calculation, under this subparagraph, are set forth in the statement of considerations.

show such prices on lists supplied to purchasers. Whenever a producer sells a commodity listed in Appendix A to ultimate consumers, or to retailers for resale to ultimate consumers, wrapped in packaging materials, he shall either print the maximum price to ultimate consumers on the packaging materials or he shall show such maximum price on the label or other device attached to or inserted in the package so that it may readily be seen by the buyer: Provided, That if a producer who sells directly to ultimate. consumers delivers a list to the purchaser containing the names of and his maximum prices for every commodity included in Appendix A which he offers for sale to purchasers, he need not place his maximum price upon the packaging materials of any such commodity. No sale shall be made to any purchaser pursuant to the foregoing proviso after his expiration of 14 days from the date upon which such a list is delivered to such purchaser.

- 5. Section 16 (a) (2) is amended to read as follows:
- (2) "Producer" means, with respect to any lot of the commodities covered by this regulation, the person who baked, manufactured, produced or processed the same in the operation of a business.
- 6. Section 17 is added to read as follows:

Sec. 17. Reasonable tolerance permitted. Each individual item of a commodity produced by a baker need not weigh as much as, or more than, the weight reported for the commodity under section 13. A reasonable tolerance shall be permitted as to individual items, but the producer must comply with the purpose of section 13 by maintaining average weights that conform to the weight reported under that section.

This amendment shall become effective October 28, 1944.

Note: The record keeping and reporting requirements of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 28th day of October 1944.

(b) Truck delivery by private truck. When shipment is by truck owned or controlled by the seller, the following amounts may be added for transportation: For distances up to and including 10 miles, \$1.50 per M; over 10 miles and up to and including 20 miles, \$2.00 per M; over 20 miles and up to and including 30 miles, \$2.50 per M; over 30 miles an addition of 5 cents per mile per M feet may be added to the \$2.50 per M charge permitted for first 30 miles. Distance as used in this paragraph means the distance from the mill to the point of destination as measured by the speedometer. No addition may be made for the return trip.

(c) Trucking to railhead. When a truck haul precedes rail shipment, as when a mill located away from a railhead hauls lumber by truck to the railhead, no addition may be made for the truck haul. However, where a mill's rail connection has been abandoned since September 5, 1941, the mill may apply for special permission to make an addition.

The application should be made by letter to the Lumber Branch of the Office of Price Administration, Washington 25, D. C., and may be acted upon by letter or telegram. The addition may not be made on quotations or sales until permission has been received.

(d) Susanville rate on delivered sales to California. Regardless of other provisions of this section, on delivered sales to purchasers in California, when shipment is made by common or contract carrier if shipment originates at a mill in California from which the railroad freight rate to the California destination is less than the rate from Susanville, California, to the same destination, the addition for transportation may be computed by multiplying the appropriate estimated weight as shown in Article VI by the applicable freight rate from Susanville, California to the California destination. This provision does not apply to f. o. b. mill sales nor to directmill retail sales.

This amendment shall become effective November 2, 1944.

in a proper case, adjustments in the base-period use or allotments of an industrial user where it is shown that:

(1) Fire, floods, strikes, or other similar catastrophes affecting his operations during the base period caused his baseperiod use to be less than it otherwise would have been: or

(2) He invested in productive equipment or facilities before March 29, 1943, which he did not begin using until after the beginning of his base period with the result that the additional capacity to use foods covered by this order, so obtained, was not adequately reflected in his baseperiod use.

However, no application by an industrial user for an adjustment in his baseperiod use or allotments based on any of these reasons or on any other condition, occurrence or fact existing before March 29, 1943, will be granted unless the application, in writing, is filed before December 15, 1944. # PART 97-REROUTING OF TRAFFIC [S. O. 247]

COTTON AT OR EN ROUTE TO BIG SPRING, TEX.

At a session of the Interstate Commerce Commission, Division 3, held at its office in Washington, D. C., on the 28th day of October, A. D. 1944.

It appearing, that there is an accumulation of cars loaded with cotton on the rails of The Texas and Pacific Railway Company at or en route to Big Spring, Texas, held, or which will be held for compressing in transit by the Western Compress Storage at said city, and for subsequent reshipment thence by the way of Fort Worth, Texas, and the Inter-national-Great Northern Railroad Com-pany (Guy A. Thompson, Trustee) to Houston, Texas, or Galveston, Texas; that

the inability of the compress at Big Spring, Texas, to process the inordinate volume of cotton is unduly delaying and impeding the use, control, supply, movement, and distribution of such cars; in the opinion of the Commission an emergency exists requiring immediate action to prevent a shortage of equipment and congestion of traffic.

It is ordered, that:

(a) (1) Cotton at or en route to Big Spring, Texas. The Texas and Pacific Railway Company, a common carrier by railroad, subject to the Interstate Commerce Act shall forward forthwith and transport all cars described in subparagraph (2) hereof to Fort Worth, Texas, and there interchange said cars to the International-Great Northern Railroad Company (Guy A. Thompson, Trustee) a common carrier by railroad subject to the Interstate Commerce Act, which latter carrier shall forward forthwith and transport said cars either to Marlin, Texas, or to Waco, Texas, for compressing in transit by the Export Oil Compress Company in accordance with the direction set forth in paragraph (b) hereof;

(2) All cars loaded with cotton on the rails of The Texas and Pacific Railway Company at or enroute during this emergency, to Big Spring, Texas, held, or which will be held during this emergency, for compressing in transit by the Western Compress Storage at said city and for subsequent reshipment by the way of Fort Worth, Texas, and the International-Great Northern Railroad Company (Guy A. Thompson, Trustee) to

Houston, Texas, or Galveston, Texas.
(b) Distribution of cars. The International-Great Northern Railroad Company (Guy A. Thompson, Trustee) shall forward forthwith, transport, and shall distribute said cars described in paragraph (a) hereof to the said compress facilities at Waco, Texas, and Marlin, Texas, in accordance with the indicated ability of said compresses, located at said cities, to unload cars promptly without undue detention, and shall thereafter forward and transport said shipments to the destination or port to which originally consigned.

(c) Rates to apply. The rates applicable to traffic forwarded and transported in accordance with the provisions of this order shall be the rates which would have applied had the cotton been compressed in transit at Big Spring, Texas.

(d) Tariff provisions suspended. The operation of all tariff rules or regulations insofar as they conflict with the provisions of this order is hereby suspended.

(e) Announcement of suspensions.
The Texas and Pacific Railway Company and the International-Great Northern Railroad Company (Guy A. Thompson, Trustee), or their agents, shall publish, file, and post a supplement to each of their tariffs affected hereby, in substantial accordance with the provisions of Rule 9 (k) of the Commission's Tariff Circular No. 20 (§ 141.9 (k) of this chapter) announcing the suspension required in paragraph (d).

(f) Intrastate commerce. The provisions of this order shall apply to-intrastate commerce as well as interstate commerce. (40 Stat. 101, secs, 402, 418, 41 Stat. 476, 485, secs. 4, 10, 54 Stat. 901, 912; 49 U.S.C. 1 (10)-(17), 15 (4))

It is further ordered, that this order shall become effective at once; a copy shall be served upon the Railroad Commission of Texas; a copy of this order and direction shall be served upon The Texas and Pacific Railway Company, and the International-Great Northern Railroad Company (Guy A. Thompson, Trustee), and upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and per diem agreement under the terms of that agreement: and that notice of this order be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D. C., and by filing it with the Director, Division of the Federal Register.

WAR PRODUCTION BOARD.
[C-229]

A. E. GARNER & Co., INC.

CONSENT ORDER

A. E. Garner & Company, Inc., a New York corporation with its principal office and place of business at 170 Fifth Avenue in the City of New York, since May, 1943. has been engaged in the business, among other things, of buying and selling sterling silver chains for soldiers' and sailors' identification tags. The corporation is wholly owned, and the business operated, by Mr. A. E. Garner himself. A. E. Garner & Company, Inc., is charged by the War Production Board with having on or about October 6, 1943, issued a certification to Pilling Chain Company of Providence, R. I., extending a preference rating of AA-1 to obtain the delivery of 144,-000 sterling silver identification chains, whereas it was entitled, and A. E. Garner, its principal officer and stockholder, knew it was entitled, to make such certification to obtain delivery of but 14,400 sterling silver identification chains. A. E. Garner & Company, Inc., was further charged by the War Production Board with having on February 1, 1944, to obtain delivery of 28,800 sterling silver chains, and again on May 1, 1944, to obtain delivery of 57,-600 sterling silver identification chains from Pilling Chain Company of Providence, R. I., issued certifications extending a preference rating of AA-1, whereas it was not entitled, and said A. E. Garner knew it was not entitled, to issue any such certifications. A. E. Garner & Company, Inc. was further charged with having between the first part of October, 1943, and June, 1944, disposed of a large but undetermined number of sterling silver identification chains to persons and parties who were not entitled to the preference ratings which A. E. Garner & Company, Inc. had extended to obtain and deliver the same. These were violations of Priorities Regulation No. 1 and Priorities Regulation No. 3 with the provisions of which Mr. A. E. Garner was personally familiar. The violations were shown at hearings before a Compliance Commissioner to have occurred; they, therefore, must be deemed to have been wilful on the part of A. E. Garner & Company, Inc. and on the part of Mr. A. E. Garner, individually. They state that they do not care to contest the showing of the violations or their wilful character; and the corporation, through its duly authorized officer and sole stockholder, Mr. A. E. Garner, individually and voluntarily requested that the hearings be discontinued and that the following suspension order be issued and made effective against them, their successors and assigns.

Wherefore, upon the agreement and consent of A. E. Garner & Company, Inc. and A. E. Garner, individually, and of the Regional Attorney and Regional Compliance Manager, and upon the approval of the Compliance Commissioner, It is hereby ordered, That:

(a) From and after the effective date of this order to the first day of February,

1945, deliveries of material of whatsoever nature to A. E. Garner & Company, Inc. or to A. E. Garner, individually, their successors and assigns, shall not be accorded priority over deliveries under any other contract or purchase order and no preference rating and no quotas or allotments of quotas shall be assigned, or applied to such deliveries by means of preference rating certificates, preference rating orders, general preference orders, or CMP allotment symbols or any other orders or regulations of the War Production Board except as may be hereafter specifically authorized in writing by the War Production Board.

(b) Nothing contained in this order shall be deemed to relieve A. E. Garner & Company, Inc., or A. E. Garner, individually, their successors or assigns, from any restrictions, prohibitions, or provisions contained in any other order or regulation of the War Production Board except

insofar as the same may be inconsistent to the provisions hereof.

(c) This order shall take effect on October 29, 1944, and shall expire on January 31, 1945.

Issued this 19th day of October 1944.
